

RFP NNK15549749Q - KSC RAIL SYSTEM OPERATIONS

Questions

1. What is the total length of the SRB segment car?

See Diagram.

2. What is the total weight of the segment car along with the car weight added for a total car/segment load weight?

The maximum car/segment load weight depends on the load distribution on a particular car in a particular train and what order the cars are in. The SLS Aft Assembly car (see diagram above), with booster segment, weighs 547 KIP (kilo Pound) or 547,000 lbs. See NNK15549749Q, Statement of Work - REV. 1, Section 5.

3. Can we have access to the NASA "spacer" car located at the LMF? This car is empty at present and we would like to use it for the spacer car requirement?

No.

4. If we are allowed use of this NASA empty car, can we have NASA ballast added to the car to allow maximum weight transfer when moving the SRB segment car?

See Question 3.

5. Will we be allowed to purchase diesel fuel on KSC for refueling our Trackmobile?

No.

6. Will we be able to use the empty aftskirt car (NLAX170)?

No.

7. What is the minimum track curve radius at the KSC rail system?

The minimum curve radius is 12 degrees (max is 22 degrees).

8. Will both Booster Segments be delivered to Jay Jay Yard prior to the contractor being requested to perform the operation?

Once a delivery date is set (at least a month in advance) the contractor shall be on site prior to segment delivery to address training, access, track inspection/walk down, equipment delivery, and all other requirements necessary to perform the requirements of the Statement of Work.

9. Is the project duration of two (2) weeks an estimate or the maximum duration of the project? If an estimate, is it acceptable to submit a daily “all in rate” to be charged according to the actual number of days of the project?

The two (2) weeks is the minimum duration with a daily rate for unforeseen circumstances. See NNK15549749Q - REV. 1.

10. Can vendors submit their proposals by email to the contracting officer? If not, how should vendors submit their proposals?

Yes. Proposals shall be submitted by email to the Contracting Officer.

11. What is the rail interchange and delivering carrier to the KCS rail system?

Florida East Coast Railway is the delivering carrier and it is officially the Titusville interchange.
